

# Eagle Anvils.

These anvils are fully warranted. The "Peter Wright" and all anvils, except the EAGLE, are made with a body and horn of fibrous wrought iron. This soft iron gradually settles, carrying the face with

it, and the anvil becomes hollowed on the face. Shear steel for the face is used, but it can never be made to take good temper like cast steel. The EAGLE ANVIL body is made of gun metal—crystallized iron—which neither settles nor breaks, and not only the face, but the horn also, is of the best Tool Cast Steel, welded on so perfectly by the process of its original and only inventor, the late Mr. Mark Fisher, that it is warranted never to come off. The face, planed to a true surface, is made so hard that it always remains so. The steel horn is tough and unhardened and will not break or bend.
